

Fig. 1 is a side cross-sectional view of a mobile shelving unit. The unit features a main frame (1) with two vertical tracks (3, 4) and a series of horizontal shelves (2). The shelves are supported by a series of rollers (10) and are mounted on a base (5) with casters (6). A locking mechanism (7, 8) is shown on the right side of the shelves. A dimension line indicates a distance of $2 \times S$ between two shelves. A dashed circle labeled IV is shown on the left side of the unit.
